

APR 23 2015

Ms. Martha E. Michels  
Assistant Director for ESH&Q  
Fermilab  
P.O. Box 500  
Batavia, IL 60510

Dear Ms. Michels:

SUBJECT: NATIONAL ENVIRONMENTAL POLICY ACT DETERMINATION AT FERMI  
NATIONAL ACCELERATOR LABORATORY (FERMILAB) – “SITE-WIDE  
CATEGORICAL EXCLUSION: ROUTINE MAINTENANCE”

Reference: Letter, from M. Bollinger to B. Chrisman, dated March 4, 2010, Subject: Same As  
Above

The Fermi Site Office (FSO) has reviewed Fermilab's "Site-Wide Categorical Exclusion (CX):  
Routine Maintenance" that was approved by FSO on March 4, 2010. FSO reviewed the CX as  
part of a 5-year review cycle to determine whether the site-wide routine maintenance activities  
and conditions covered by the CX are still applicable to Fermilab's operations. FSO's review  
determined that the site-wide routine maintenance activities and conditions covered by the CX  
are still applicable.

No further National Environmental Policy Act (NEPA) review is required for projects and/or  
activities meeting the conditions specified in the approved CX, which falls under a CX provided  
in 10 CFR 1021, as amended in November 2011. FSO plans to conduct 5-year NEPA reviews  
of the CX to assure the activities and conditions covered by the CX are still applicable to  
Fermilab's operations. Therefore, the next NEPA review will be in 2020. If you have any  
questions, please contact Rick Hersemann, of my staff, at extension 4122.

Sincerely,

Michael J. Weis  
Site Manager
