April 1, 2016

Ms. Martha E. Michels
Chief Safety Officer
Fermilab
P.O. Box 500
Batavia, IL 60510

Dear Ms. Michels:

SUBJECT: NATIONAL ENVIRONMENTAL POLICY ACT DETERMINATION AT FERMI
NATIONAL ACCELERATOR LABORATORY – DEMOLITION OF TRAILER 121

Reference: Letter, from M. Michels to R. Hersemann, dated March 31, 2016, Subject:
National Environmental Policy Act Environmental Evaluation Notification Form for
the Demolition of Trailer 121

The Fermi Site Office (FSO) has reviewed the National Environmental Policy Act (NEPA) Environmental Evaluation Notification Form (EENF) for the Demolition of Trailer 121. Based on the information provided in the EENF, the following categorical exclusion (CX) is approved:

<u>Project Name</u>	<u>Approved</u>	<u>CX</u>
Demolition of Trailer 121	3/31/2016	B1.16, B1.23

Enclosed is signed copy of the EENF for your records. No further NEPA review is required. This project falls under categorical exclusions provided in 10 *CFR* 1021, as amended in November 2011.

Sincerely,

Michael J. Weis
Site Manager

Enclosure:
As Stated

FERMILAB ENVIRONMENTAL EVALUATION NOTIFICATION FORM (EENF) for documenting compliance with the National Environmental Policy Act (NEPA), DOE NEPA Implementing Regulations, and the DOE NEPA Compliance Program of DOE Order 451.1B

Project/Activity Title: Demolition Trailer 121
ES&H Tracking Number: 01137

I hereby verify, via my signature, the accuracy of information in the area of my contribution for this document and that every effort would be made throughout this action to comply with the commitments made in this document and to pursue cost-effective pollution prevention opportunities. Pollution prevention (source reduction and other practices that eliminate or reduce the creation of pollutants) is recognized as a good business practice which would enhance site operations thereby enabling Fermilab to accomplish its mission, achieve environmental compliance, reduce risks to health and the environment, and prevent or minimize future Department of Energy (DOE) legacy wastes.

Fermilab Action Owner: Jonathon Hunt (X4312)

I. Description of the Proposed Action and Need

Purpose and Need:

The purpose of the proposed action/project is to demolish and remove the trailer 121. Due to the dilapidated state of this trailer, it can no longer serve a useful function and therefore should be eliminated. The demolition of this trailer is needed to eliminate costs associated with maintenance and utility services of it and to remove the safety and subsequent liability associated with it.

Proposed Action:

This proposed action would completely remove the trailer and the site would be returned to its original profile and revegetated. The trailer would be completely demolished by a subcontractor and all recyclable materials would be recycled and this would be reported to the property office.

Alternatives Considered:

The only alternative is to leave the trailer as is but this 'no action' alternative would not meet the purpose and need.

II. Description of the Affected Environment

This proposed action would completely remove the trailer, involving a total area of 1200 square feet. Additional environmental effects are included in Section III.

III. Potential Environmental Effects (If the answer to the questions below is "yes", provide comments for each checked item and where clarification is necessary.)

A. Sensitive Resources: Would the proposed action result in changes and/or disturbances to any of the following resources?

- Threatened or endangered species
- Other protected species
- Wetland/Floodplains
- Archaeological or historical resources
- Non-attainment areas

B. Regulated Substances/Activities: Would the proposed action involve any of the following regulated substances or activities?

- Clearing or Excavation
- Demolition or decommissioning
- Asbestos removal
- PCBs
- Chemical use or storage
- Pesticides
- Air emissions
- Liquid effluents
- Underground storage tanks
- Hazardous or other regulated waste (including radioactive or mixed)
- Radioactive exposures or radioactive emissions
- Radioactivation of soil or groundwater

C. Other Relevant Disclosures: Would the proposed action involve any of the following actions/disclosures?

- Threatened violation of ES&H permit requirements
- Siting/construction/major modification of waste recovery or TSD facilities
- Disturbance of pre-existing contamination
- New or modified permits
- Public controversy
- Action/involvement of another federal agency
- Public utilities/services
- Depletion of a non-renewable resource

IV. Comments on checked items in section III.

Clearing and Excavation

Minimal excavation would take place near the trailer for removal and capping of utilities and no spoils are anticipated. Soil erosion control measures (i.e. silt fences, etc.) would not be necessary.

Demolition or decommissioning

This proposed action would completely remove the trailer.

Asbestos Removal

The trailer would be inspected/tested for asbestos prior to demolition. All asbestos related material would be abated and removed by a licensed asbestos contractor. The Fermilab Environment, Safety, Health and Quality (ESH&Q) Section would be involved in any asbestos work.

Hazardous or other regulated waste

To the extent possible, materials would be recycled. A determination would be made, prior to demolition, by Radiation Safety and the ESH&Q personnel on whether or not material from this trailer is recyclable.

V. NEPA Recommendation

Fermilab staff has evaluated the proposed action and believe a Categorical Exclusion is appropriate. It is believed that the proposed action meets the description found in DOE's NEPA Implementation Procedures, 10 CFR 1021, Subpart D, Appendix B1.16, and B1.23 as follows.

B1.16 Asbestos Removal

Removal of asbestos-containing materials from buildings in accordance with applicable requirements (such as 40 CFR part 61, "National Emission Standards for Hazardous Air Pollutants"; 40 CFR part 763, "Asbestos"; 29 CFR part 1910, subpart I, "Personal Protective Equipment"; and 29 CFR part 1926, "Safety and Health Regulations for Construction"; and appropriate state and local requirements, including certification of removal contractors and technicians).

B1.23 Demolition and Disposal of Buildings

Demolition and subsequent disposal of buildings, equipment, and support structures (including, but not limited to, smoke stacks and parking lot surfaces), provided that there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment.

VI. DOE/Fermi Site Office (FSO) NEPA Review

Based upon my review of information conveyed to me and in my possession concerning the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1A), I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

FSO NEPA Compliance Officer: Rick Hersemann
